

WELLSPRING HEALTH CENTER

Dr. Kowalski and her Staff are back in the office!

Our doors are back open and we are taking every precaution to maintain the safety and wellbeing of our patients. All patients must wear a mask covering the mouth and nose. Upon entering the office, we take the temperature of the patient and have the patient wash their hands. To maintain social distancing, we have patients enter through the front door and exit through the back door to minimize contact.

We look forward helping you.
